## COMPANY

---

Established in 1993.

We have been in business for over 20 years. Rollingshield was the first company to receive a product approval from Dade County, for an impact resistant roll shutter, after the code changes implemented as a result of Hurricane Andrew in 1992. Rollingshield® is not only dedicated to bringing you the highest quality product using the highest quality materials with the finest aluminum alloys, fabrics and powder coated product finishes but also one that looks good.

Rollingshield™ is not only dedicated to bringing you the highest quality product but also one that looks good. Most awnings on the market have limitations, among them color and style.

Rollingshield™ has created some of the most impressive and durable systems on the market.

Rollingshield™ is committed to providing a broad spectrum of advanced high quality products that keep pace with the fast moving construction industry.

Rollingshield™ products have given many architects, designers, building contractors, developers and facility managers the competitive edge by allowing them to specify an innovative and effective solution for energy conservation and protection from the effects of the sun. Today these are exciting, new and advanced products that enhance the design, operation and market appeal of any building.

Rollingshield™ has built a reputation for quality craftsmanship by working with a group of architects and engineers that are constantly monitoring the product for reliable performance.

The beauty of Rollingshield™ awnings is that they are designed to complement the existing structure and not detract from its architectural beauty.

For more information on our products, please visit our website: [www.rollingshield.com](http://www.rollingshield.com)

UNIVERSAL

## PRISMA

The Prisma is a unique variation of Rollingshield's Universal retractable awning. A bar mounted on top of the elbows not only gives the Prisma its unique look, it also makes it more stable in windy conditions and it impedes water buildup on the fabric if accidentally left out in the rain and provides additional shade.
